

European Ecosystem Event on 6G

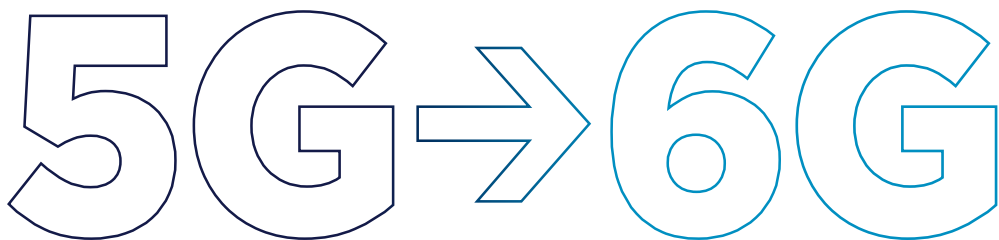

Shaping the
R&I Vision
of 6G

ECO6G

Barcelona, 10 February, 2022

Organized by

We are well into the 5G era.
Now is the time to envision
what 6G will be.

**For 6G to be a reality,
we need to ask:
What? Why? How? When?**

These questions deserve discussion and answers to be provided by the 6G community stakeholders, which emerge from the 5G community but will also extend to new players in a highly dynamic ecosystem.

Motivated by this, the i2CAT Foundation promotes and organizes **ECO 6G**, an event born to become an international reference point for 6G discussions.

For this first edition, key 5G and future 6G stakeholders will sit together to discuss about 6G from a European perspective, providing both the unified vision of Europe as a leading world region in 5G, and also giving voice to the individual initiatives put in place by the different member states.

ECO6G

ECO6G is a great strategic networking opportunity for policy makers, business leaders and the research community.

Speakers

Featuring distinguished and knowledgeable speakers that represent the voice of policy makers, program leaders, industry representatives, users, and key academic players.

Online and On-site

ECO6G will combine on-site and online elements in an open broadcast. Some speakers will participate live from Barcelona, in a space that will accommodate a number of selected guests, while others will be connected remotely.

Attendees will have the opportunity to join free and virtually from anywhere in the world, using a high-quality and reliable streaming service.
